

Camelot House & Lodge

Nursing and Residential Home for Dementia and Mental Disorder

“Our staff are Caring and Compassionate and this enables them to develop individual relationships and promote a feeling of family life”

Dear Visitor,

Camelot House & Lodge is a home for 90 residents who have symptoms of dementia and mental disorder. The home serves the needs of people who are mobile and articulate to those who are very dependent and who find it very difficult to communicate.

The home has a multi-national workforce of over 90 staff. Training and development is a high priority.

The home has achieved Beacon Status in the Gold Standards Framework for end of life care and implements the principles of the Namaste end of life care programme which aims to maintain the highest possible quality of life for individuals with severe dementia. A Namaste room is provided to encourage high physical and sensory stimulation. The Home was a national finalist in the 'Gold Standards Framework' Care Home of the Year 2016.

Camelot House has developed over the past 12 years with dementia care in mind, and aims to provide a safe, secure and homely environment where the residents can move freely both inside and outside into the garden areas. Camelot Lodge is a purpose built addition to the House providing the same high quality of care as the House along with the latest technologies in nursing and health care systems.

Through working closely with GPs, the home's policy is to be very sensitive to the needs of each resident and to minimise the use of antipsychotic medicine. We operate a key nurse and a key worker system for each resident as part of our commitment to person-centered care, allowing our trained staff to really get to know an individual's needs. Our person centered care plans are evaluated monthly by the key nurse, and are available to see if asked.

The home has a Friends of Camelot group and social fund raising events are organized throughout the year, with all the money raised going to the benefit of the residents. Our range of activities are designed to cater for a wide range of interests, skills, experiences, personalities and medical conditions. Whether a person prefers to relax and reflect on life with one of our friendly team, or chooses to a pot and plant in our stimulating gardens, we provide the security and facilities to make it so.

We encourage family and friends to be fully involved in the care of their relatives with open visiting encouraged.

I hope you enjoy looking around Camelot House, and if you have any further questions do not hesitate to contact me.

Yours sincerely

The Registered Manager
